Keep closed in dry place; avoid excessive heat.

Do not use if safety seal is broken or missing.
Enzymedica does not use ingredients produced using biotechnology.

PLEASE KEEP OUT OF REACH OF CHILDREN

Many people have difficulty digesting gluten and casein proteins commonly found in carbohydrates, resulting in discomforts like occasional gas and bloating. Even those on gluten-free/casein-free diets may experience difficulties due to cross-contamination from offending foods.

GlutenEaseTM contains Protease Thera-blendTM (G1) along with DPP-IV activity for enhanced digestion of foods containing gluten and casein.* Starch-digesting amylase enzymes assist in the digestion of the carbohydrate portion of grains, such as wheat, which contain gluten.

Recommended Use: 1 capsule with each meal containing gluten or casein. More may be taken as needed.

This product is not intended to replace a gluten-free diet for individuals with Celiac Disease.

Thera-blendTM is an exclusive process that combines multiple strains of enzymes that work in various pH levels. Thera-blend enzymes have been shown to be three times stronger and work more than six times faster than leading digestive supplements.*
